LIGHTING

A variety of lighting is available for special effects.

Self aligning magnetic (SAM) bars. Option of plastic, metal or (3 in 1) connected bars. All have magnetics applied for a stronger grip to the panels.

The SPIDER is Weaving a Revolution in POPUP Displays!

Why?

Because we listened to what you wanted.

"I want it fast."

An efficient production technique gets your "Spider" display built and in route within 4 days.

"I want it to be reliable."

'Back to basics' construction creates a trouble free frame that is guaranteed for life. If a forklift runs over it, it is field repairable with the locknut and bolt assembly.

"I want it to be sturdy."

Do the 'shake test' against any major brand. Our clients tell us they love the Spider's stability when comparing to other PopUps being set up around them at the shows. The self-aligning magnetic panels hold firm.

"I want it to be lightweight."

The Spider is the ultra lightweight PopUp allowing the booth, lights, counter kit and graphics, all to fit into ONE, standard wheeled case that ships UPS or carry-on.

"I want it to be affordable."

At a price anyone can afford, it's the best value, quality PopUp we've seen!

"I want it to be easy to use."

The Spider's simple, no nonsense design allows you to change it from a 10 foot to an 8, 6, or 4 foot wide booth within minutes...ON-SITE! The Spider also features adjustable feet for uneven floors.

Don't forget all 20 foot booths can be used as two 10 footers when needed.

SPIDER: For Unsurpassed Value

BASIC or STANDARD SERIES

- The basic series is limited to 5' tabletops with PVC bars and 8' and 10' curved kits with aluminum channel bars either single or 3 in 1.
- The basic kits do not include a light compartment with a spare bulb in the cases as do the standard series.
- Fabric panels are vegas fabric while the standard series are front runner.
- The basic series is a less expensive series and the standard series offers a complete line of options and accessories including digital panels.
- Both series have the same strong but lightweight frame with adjustable feet. The frame has a lifetime guarantee.
- Panel options include fabric, digital and vinyl.
- Accessories include interior and exterior shelving, backlighting, case to counter conversion kits, backlit headers, and lighting.
